Commercial Drivers License Program

The Division of Continuing Education, in partnership with Driver Training & Management, Inc., offers a Commercial Drivers Licensing program. The mission is to provide a quality training program for commercial motor vehicle operators. The level of training and knowledge of commercial motor vehicle operation and driver safety will reduce many of the expenses related to unsafe driving, further reducing the overall cost to businesses and society. All necessary buses, tractors, trailers, fuel, books, supplies and equipment, audio and visual equipment (PowerPoint Video Projector, VCR, television, etc.) will be made available, as needed. Learning materials are broken down into modules and are practical and easy to use. In addition, interactive internet-based training modules are available under special arrangements.
